

To avoid having to constantly register your device, please turn off
MAC address randomization:

Android Devices - Turn off MAC Randomization for Android 10 and later

- Swipe down from the top of the screen.
- Press and hold the Wi-Fi icon until the network list opens.
- Tap the settings icon (typically looks like a gear).
- Click Advanced
- In the **MAC Address Type** field, select **Phone MAC**.

Apple iPhone, iPad, iPod touch, Apple Vision Pro - Turn off private address

- Open the Settings app, then tap Wi-Fi.
- Tap the information button (i) next to a network.
- Tap Use Private Address to turn it OFF. If your device joined the network without using a private address, a privacy warning explains why.
- The new setting is used the next time your device joins the network. If you want to use it immediately, turn Wi-Fi off and back on in Control Center or Settings, then join the network.

Apple Mac - Turn off private address

- Choose Apple menu > System Settings, then click Wi-Fi in the sidebar.
- Tap the name of the network you joined. If you haven't joined the network yet, swipe left on its name and tap more.
- Tap Private MAC to turn it OFF.
